

# FE- Assignment

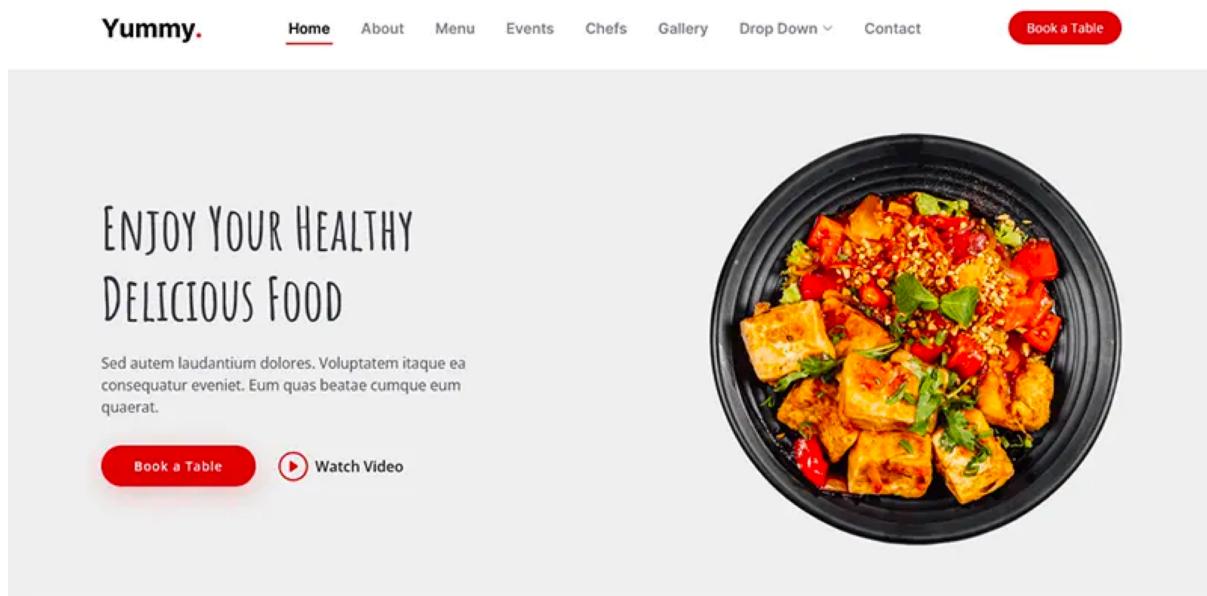

Task - Create a feature for capturing screenshots to enhance an issue/bug ticketing system.

Note -

1. You can use any dummy website or [google.com](https://www.google.com) for background purpose.
2. No other library can be used for css
3. Strictly in React/Next.js

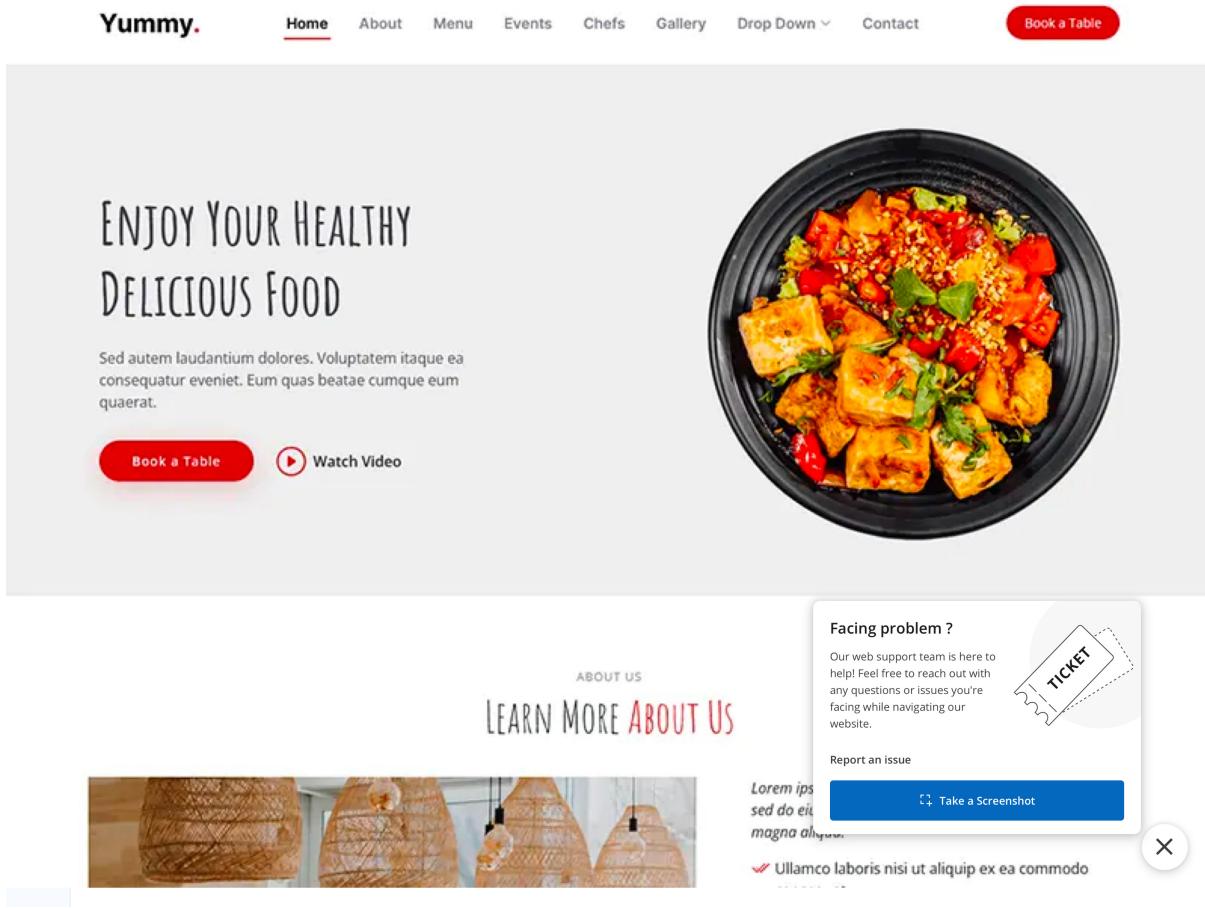

Steps -

1. Open any dummy page/website create a floating blue icon in the bottom right

2. On Click of the icon this component will show up with a pop-over and on cross it'll close.

bonus - can add a transition not necessarily required

3. On Click of "Take a Screenshot" button it'll open a floating icon with 3 options

Custom Area - Select a particular area to take screenshot

Full Screen - Take a screenshot of full screen

Close - Close the icon and return to previous screen

Note - Icons should not come in the screenshot captured.

*Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.*

*Ullamco laboris nisi ut aliquip ex ea commodo*

## 4. Custom Area Selection

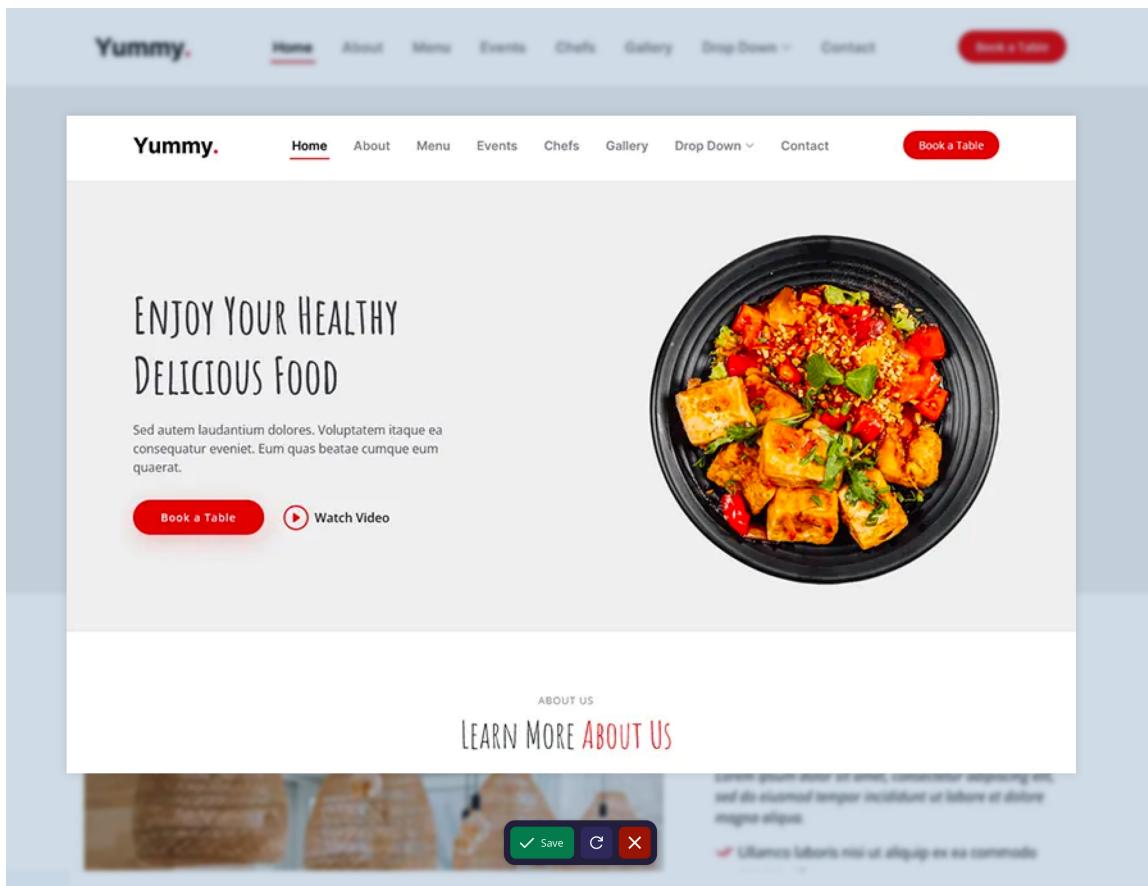

5. After selection you'll get 3 icons again.

Save - Save the screenshot and go to the next screen.

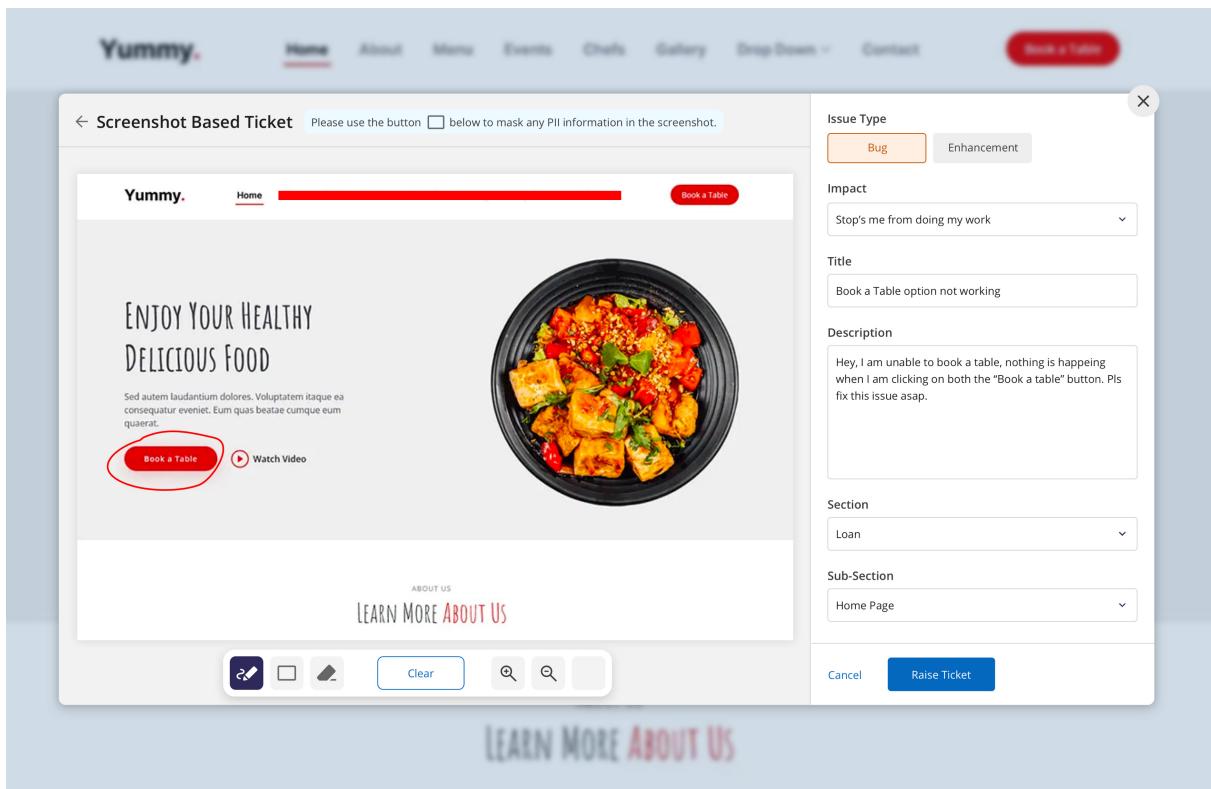

Retake - Retake the screenshot this will take back to the previous screen

Close - take back to 2nd screen.

6. On click of save open this modal to show the screenshot on the left with the ability to write some notes/draw/erase on it or zoom in/out. and on the right according to the screen given.

Note - Skip PII Information on the top.

7. On click of Raise Ticket console the json structure and show a snackbar message "Ticket Raised Successfully" at the top and on close and cancel go to the screen 1.

8. On Click of back icon go to the previous screen

Deploy changes on Netlify/vercel and share the url of assignment along with code changes.

Note : Add-ons/Edge-cases will be a plus.

Thanks.
